

## Golden OPEN Acrylics

**GOLDEN**  
 OPEN ACRYLICS™

Golden OPEN Acrylics are a new line designed for the professional artist, they prolong the working time of the paint allowing artist's to work in new exciting ways while retaining the advantages of normal acrylic. The lengthened drying times allow the acrylic artist to experiment with oil painting techniques such as glazing, shading, wet in wet and fine detail.

OPEN acrylics stay wet on the palette for longer and resist skinning making them workable for up to 24 hours. This means they can be used in new ways such as plein air painting, monoprinting and screen printing.

The paints have their own range of mediums especially designed for maintaining the drying times. They can however be mixed with all the other Golden mediums although working times will be reduced. Once dry the acrylic is permanent as with conventional acrylics and can be varnished in the normal way.
