

Permaset Aqua Screen Inks

Permaset Aqua is a new screen ink designed mainly for printing onto fabrics but it can also be used to print onto paper and other porous surfaces. It combines new polymer technology with pure pigments to produce a 100% solvent free, environmentally friendly and easy to use ink. It comes in 2 ranges, Aqua Regular and Supercover, the Supercover being more opaque and designed for coverage on dark fabrics. The Aqua Regular range also has 'Glow' fluorescent colours and metallic colours. The ink is low odour and adheres well to the fabric making it wash and dry clean resistant.
