

## Tofko Professional Top Roller-Driven Press

Tofko developed this range recently, to meet demand. What makes this press exceptional is the fact that it is driven by the upper roller which maximises the weight of the upper roller during printing.

## Aquatint Box

The Aquatint boxes are made with varnished plywood by Polymetal and are available in 2 sizes. The action of both the SK-50 and the SK-80 is based on the traditional hand driven paddle wheel which is driven by a handle on the outside. It has a wooden grill that slides out so the plate can be placed on it easily. The SK-50's grill is in a fixed position whereas the SK-80 has a turning ratio of 2:1. Available to order only.
